

**Date:** September 2017

**Location:** Southern California (Los Angeles – West Side)

**Positions:**  Single  Multiple

---

## ***Full Stack .Net Software Engineer***

---

### **SKILLS WE ARE LOOKING FOR**

- Strong knowledge of the .NET framework (C#) and associated technologies
- Experience with Web Services (WCF)
- Minimum of 2 years of React or Angular
- Strong Microsoft SQL Server 12+ skills
- Proven full stack development experience
- Strong analytical skills and good problem-solving skills
- Excellent verbal and written communication skills
- Strong knowledge of SDLC and the ability to work in small team environments.

### **EDUCATIONAL BACKGROUND YOU SHOULD HAVE**

- Bachelor of Science degree required, ideally in computer science
- Master Degree a strong plus

### **OTHER REQUIREMENTS**

- US citizens or Green Card holders only, no H-1b visa holders

### **WHERE YOU WILL WORK**

- We are based in Santa Monica, and you will be working at a client site here in Los Angeles on the West Side, close to world famous beaches, entertainment and young like-minded people.
- Relocation assistance may be considered

### **WHAT YOU WILL WORK ON**

- Design and develop rich user-focused business applications and large enterprise systems.
- Work on cutting edge technology with some of the world's most exciting projects and companies.
- Work with end-user and engineering staff to understand their needs and vision; use this knowledge to create state-of-the-art software.

---

## RESPONSIBILITIES

- Participate in requirements analysis and develop solutions for all tiers of applications: user interface, middle-tier business components, database layer, etc.
- Be a key contributor to innovation and build proof of concept examples that can be leveraged across current and future software release versions.
- Work independently and/or in small teams.

## WHAT WE'RE LOOKING FOR

- You are restless, curious and creative.
- You are a quick learner and are always working on and learning about the next big thing on the horizon.
- You have a strong computer science foundation and are passionate about web development.
- You have worked on several projects and have done your own little side projects.
- You are a familiar name on Stackoverflow and Github and have a few open source projects on your resume.
- Solid knowledge of web and http is critical and you know HTML5 and CSS inside out.
- Strong React and/or Angular experience, but MUST have one or the other at a minimum
- Familiarity with REST services and KnockoutJS are not critical but a plus.
- Your strong coding skills in one or more language (C#, Ruby, Java, Python, Django, PHP, C++, Obj-C, etc.) have already been proven in several large projects.
- You have worked on various ASP.NET MVC 5 applications
