### Job Description:

As a JDE Developer at ix-strata the position will be responsible for application design and programming work at client projects. The Developer will be working closely with project manager, business analysts and client end users to ensure timely delivery and maintenance of reporting and customization requirements.

### Essential Job Functions

- Provide analysis, design, development and testing for JDE applications via Enterprise One Tool Set. Development work will include reports, data conversion, interfaces and custom programs
- Create and maintain technical and business documentation.
- Write test scripts and perform unit testing for modified applications
- Modify business forms utilizing Create! Forms, Transform or BI Publisher
- Provide EDI Programming
- Participate in gathering user requirements, feasibility analysis and assist in generating functional specifications, as well as document technical specifications

### Experience and Skills

- At least 5 years of experience in JDE Development and support activities within JDE Enterprise One environment 8.12 and above.
- Experience in JDE Enterprise One Tool Sets. This includes ERW, FDA, NER, Business Functions, Table Conversions and Interoperability.
- Knowledge of third party tools such as Create!Form and EDI a PLUS
- Strong knowledge of OMW and all aspects of development cycle.
- Strong understanding of JDE Applications in at least one particular industry segment such as Manufacturing, Distribution, Transportation, Real Estate, Energy & Natural Resources, Finance, etc.
- Deep understanding of JDE file structures and relational database design
- Knowledge with Business Intelligence and BI Publisher a PLUS
- Experience in a fast-paced dynamic IS environment with rapidly changing needs and requirements.
- Excellent in oral and written communication.
- Must be detailed oriented, thorough and focused

### Where you will work

- While we are based in Santa Monica, you may be able to work remotely, whether that's your home or the beach, we don't mind.
- At times you may need to be at one of our client's sites, but it would typically alternate between on-site and off-site work.
